In all the one on the way to the study of the Right, and in the scientific research that are generated in the juridical sciences, it is practically an obligation to go to the method of the Compared Right, stiller in the world globalized in that we live, where the artificial production in the theoretical and practical order generates contributions that the frontiers of the nation's transcend.

“Casación Excepcional en Materia Penal” book whose author is the professor Roberto Ángel Badrán Blanco, the University Colegio Mayor of Cundinamarca of Colombia, he offers us, in the theoretical and practical order, a deep look about the exceptional cassation regulated in the Colombian legislation.

The work lapses by means of the development of ten chapters, beginning with a historical review of the extraordinary resource of cassation like institution of the Penal Right, so much in the general order as in the environment of the Colombian juridical order in particular; aspects that are approached succinctly in the chapters 1 and 2. (Badrán, 2023)

Sat down on the base of the legal bodies that you/they regulate the extraordinary resource of cassation, in the chapters 3, 4 and 5 are analyzed the referred institution of the Penal Right, remarking on the extension from the same one to the related crimes, the related with the exceptional cassation, their requirements and their legitimation.

Author exposes in the chapter 6 of the work, the related with the extension of the cassation to the related crimes, specifying the novel of this matter in the Colombian legislation, and exposing some considerations of the cassation room on this topic.

The chapter 7 open space to the exhibition on the steps of the cassation resource, lapsing for the terms for their presentation and the legal demands to guarantee their admission and decision. It is necessary, as requirement of essence in the right, the execution of the terms settled down in the legal bodies whose violation would annul the presentation of any resource.

It could not lack in a rigorous evaluation of marra institution, the analysis of the causal ones of cassation, because to the being one of the most technical institutions in the Penal Right, their presentation only proceeds when you are in presence of the causal ones that they are necessary in the step law. In the chapter 8 of work the causal of cassation are enunciated, without it is deepened in the explanation of the content of each one of them, for if they are interesting for the student or investigator, to carry out rigorous comparisons with what settles down on the topic in the national legislations.

The chapter 9 were reserved it stops starting from that settled down in the Law 106 of 2004, be carried out a valuation of the cassation resource, where it is necessary their origin, purpose, causal, legitimation, opportunity to interpose it, decision of the resource; among other aspects of the legal reach of this important resource.

Those that come closer to the study of this work, as much from the pre-degree as from the pos-degree, found as an element of great utility, the content of the Annexes that are presented, where the author's experiences are shown in the professional exercise as lawyer litigant, in the presentation of cassation demands that were admitted in their moment by the Supreme Court of Justice-room of Penal Cassation. They are exposed the presented cassation resources so much, as those "Considerations of the Supreme Court of Justice"; all that which puts in the reader's hands so much theoretical considerations as practical about the presentation and decision of the cassation resource; as well as the additional contributions that represent the analyses of the concrete cases that generated the juridical-penal debate.

In the Annexes that constitute the colophon of the book, a total of four demands of penal cassation, and the respective sentences of the Supreme Court of Justice-room of Penal Cassation are presented by means of which was given answer to the resource presenting.

The work in general presents a balance among the theory, the precepted in the sensible ones legal that regulate the institution of the penal cassation and the practical application of the same one; what will allow to enlarge the cultural flow and professional of all that

that it comes closer with rigor to their study. It is on the part of the students and professionals of the Right to define the points of coincidences, the likeness and the differences with that settled down in their respective national legislations, with that regulated in the Colombian penal legislation.
